A little about myself.

I am dynamic, communicative and always ready to face new challenges. Defects, have some, but I believe it is necessary to try to overcome them and not allow them to disturb my job performance. I try to have an active and healthy life, I practice sports, especially skydiving, surfing and skateboarding, I don't smoke and drink only on special occasions. I have a passion for technology, it is something that arouses so much interest and curiosity. At work, I am always looking for the perfect result and the solution that makes the lives of more practical people.
